

Genliste **NEUROPATHIE-PANEL** (**Fett markierte Gene** sind in unterschiedlichen Standard-Panels (<25kb) enthalten; siehe Begutachtungsauftrag Panel-Diagnostik)

|    | Gensymbol      | Genname   | Erkrankung(en)  | OMIM                   | Gengröße (kb) |
|----|----------------|---|---|------------------------|---------------|
| 1  | <b>AARS</b>    | <i>Alanyl-tRNA synthetase</i>                                   | CMT axonal Typ 2N   | <a href="#">613287</a> | 2,9           |
| 2  | <b>ATL1</b>    | <i>Atlastin</i>   | Hereditäre sensorische Neuropathie Typ 1D, HSN1D                              | <a href="#">613708</a> | 1,7           |
| 3  | <b>BSCL2</b>   | <i>Seipin</i>   | Distale hereditäre Motorneuropathie Typ 5A, dHMN5A                            | <a href="#">600794</a> | 1,4           |
| 4  | <i>CCT5</i>    | <i>Chaperonin containing T-complex polypeptide 1 subunit 5</i>  | Hereditäre sensorische Neuropathie (HSN) mit Spastischer Paraplegie, rezessiv | <a href="#">256840</a> | 1,6           |
| 5  | <i>DCTN1</i>   | <i>Dynactin 1</i>   | Distale hereditäre Motorneuropathie Typ 7B, dHMN7B                            | <a href="#">607641</a> | 3,8           |
| 6  | <i>DHTKD1</i>  | <i>Dehydrogenase E1 and transketolase domain containing 1</i>   | CMT axonal Typ 2Q   | <a href="#">615025</a> | 2,8           |
| 7  | <b>DNM2</b>    | <i>Dynamamin 2</i>  | CMT axonal Typ 2M   | <a href="#">606482</a> | 2,6           |
|    |                |   | CMT intermediär Typ B, dominant   | <a href="#">606482</a> |               |
| 8  | <b>DNMT1</b>   | <i>DNA methyltransferase 1</i>                                  | Hereditäre sensorische Neuropathie Typ 1E, HSN1E                              | <a href="#">614116</a> | 4,9           |
| 9  | <i>DST</i>     | <i>Dystonin</i>   | Hereditäre sensorisch-autonome Neuropathie Typ 6, HSAN6, rezessiv             | <a href="#">614653</a> | 16,6          |
| 10 | <i>DYNC1H1</i> | <i>Dynein, cytoplasmic, heavy polypeptide 1</i>                 | CMT axonal Typ 2O   | <a href="#">614228</a> | 13,9          |
| 11 | <b>EGR2</b>    | <i>Early growth response 2</i>                                  | CMT demyelinisierend Typ 1D   | <a href="#">607678</a> | 1,4           |
|    |                |   | Déjerine-Sottas-Syndrom (DSS = CMT Typ 3)                                     | <a href="#">145900</a> |               |
|    |                |   | CMT Typ 4E, dominant/rezessiv (kongenital hypomyelinisierend)                 | <a href="#">605253</a> |               |
| 12 | <b>FAM134B</b> | <i>Family with sequence similarity 134, member B</i>            | Hereditäre sensorisch-autonome Neuropathie Typ 2B, HSAN2B, rezessiv           | <a href="#">613115</a> | 1,5           |
| 13 | <b>FGD4</b>    | <i>FYVE, RhoGEF and PH domain containing protein 4</i>          | CMT demyelinisierend Typ 4H, rezessiv   | <a href="#">609311</a> | 2,3           |
| 14 | <i>FIG4</i>    | <i>FIG4 phosphoinositide 5-phosphatase</i>                      | CMT demyelinisierend Typ 4J, rezessiv   | <a href="#">611228</a> | 2,7           |
| 15 | <i>GAN</i>     | <i>Gigaxonin</i>  | Giant Axon Neuropathie 1, rezessiv  | <a href="#">256850</a> | 1,8           |
| 16 | <b>GARS</b>    | <i>Glycyl-tRNA synthetase</i>                                   | CMT axonal Typ 2D   | <a href="#">601472</a> | 2,2           |
|    |                |   | Distale hereditäre Motorneuropathie Typ 5A, dHMN5A                            | <a href="#">600794</a> |               |
| 17 | <b>GDAP1</b>   | <i>Ganglioside induced differentiation associated protein 1</i> | CMT axonal Typ 2K, dominant/rezessiv  | <a href="#">607831</a> | 1,1           |
|    |                |   | CMT demyelinisierend Typ 4A, rezessiv   | <a href="#">214400</a> |               |
|    |                |   | CMT intermediär Typ A, rezessiv   | <a href="#">608340</a> |               |
|    |                |   | CMT axonal mit Stimmbandparesen, rezessiv                                     | <a href="#">607706</a> |               |
| 18 | <b>GJB1</b>    | <i>Gap junction protein beta 1</i>                              | CMT X1, dominant  | <a href="#">302800</a> | 0,9           |
| 19 | <b>GNB4</b>    | <i>G protein subunit beta 4</i>                                 | CMT intermediär Typ F, dominant   | <a href="#">615185</a> | 1,0           |
| 20 | <i>HINT1</i>   | <i>Histidine triad nucleotide binding protein 1</i>             | Neuromyotonie und axonale Neuropathie, rezessiv                               | <a href="#">137200</a> | 0,4           |

|    | Gensymbol      | Gename  | Erkrankung(en)   | OMIM                   | Gengröße (kb) |
|----|----------------|---|--|------------------------|---------------|
| 21 | <i>HK1</i>     | <i>Hexokinase 1</i>   | CMT Typ 4G, rezessiv (Hereditäre sensomotorische Neuropathie Typ Russe)                    | <a href="#">605285</a> | 2,6           |
| 22 | <b>HSPB1</b>   | <i>Heat shock protein family B (small) member 1</i>   | CMT axonal Typ 2F  | <a href="#">606595</a> | 0,6           |
|    |                |   | Distale hereditäre Motorneuropathie Typ 2B, dHMN2B   | <a href="#">608634</a> |               |
| 23 | <b>HSPB3</b>   | <i>Heat shock protein family B (small) member 3</i>   | Distale hereditäre Motorneuropathie Typ 2C, dHMN2C   | <a href="#">613376</a> | 0,5           |
| 24 | <b>HSPB8</b>   | <i>Heat shock protein family B (small) member 8</i>   | CMT axonal Typ 2L  | <a href="#">608673</a> | 0,6           |
|    |                |   | Distale hereditäre Motorneuropathie Typ 2A, dHMN2A   | <a href="#">158590</a> |               |
| 25 | <i>IGHMBP2</i> | <i>Immunoglobulin mu-binding protein 2</i>  | CMT axonal Typ 2S, rezessiv  | <a href="#">616155</a> | 2,9           |
|    |                |   | Distale hereditäre Motorneuropathie Typ 6, dHMN6   | <a href="#">604320</a> |               |
| 26 | <b>IKBKAP</b>  | <i>Inhibitor of kappa light polypeptide gene enhancer in B-cells, kinase complex-associated protein</i> | Hereditäre sensorisch-autonome Neuropathie Typ 3, HSAN3 (Familiäre Dysautonomie), rezessiv | <a href="#">223900</a> | 4,0           |
| 27 | <i>INF2</i>    | <i>Inverted formin 2</i>  | CMT intermediär Typ E, dominant  | <a href="#">614455</a> | 3,8           |
| 28 | <b>KARS</b>    | <i>Lysyl-tRNA synthetase</i>  | CMT intermediär Typ B, rezessiv  | <a href="#">613641</a> | 1,9           |
| 29 | <b>KIF1A</b>   | <i>Kinesin family member 1A</i>   | Hereditäre sensorische Neuropathie Typ 2C, rezessiv, HSN2C                                 | <a href="#">614213</a> | 5,4           |
| 30 | <i>KIF1B</i>   | <i>Kinesin family member 1B</i>   | CMT axonal Typ 2A1   | <a href="#">118210</a> | 5,3           |
| 31 | <b>LITAF</b>   | <i>Lipopolysaccharide induced TNF factor</i>  | CMT demyelinisierend Typ 1C  | <a href="#">601098</a> | 0,5           |
| 32 | <i>LMNA</i>    | <i>Lamin A/C</i>  | CMT axonal Typ 2B1, rezessiv   | <a href="#">605588</a> | 2,0           |
| 33 | <b>LRSAM1</b>  | <i>Leucine rich repeat and sterile alpha motif containing 1</i>   | CMT axonal Typ 2P, dominant/rezessiv   | <a href="#">614436</a> | 2,2           |
| 34 | <i>MED25</i>   | <i>Mediator complex subunit 25</i>  | CMT axonal Typ 2B2, rezessiv   | <a href="#">605589</a> | 2,2           |
| 35 | <b>MPZ</b>     | <i>Myelin protein zero</i>  | CMT demyelinisierend Typ 1B  | <a href="#">118200</a> | 0,7           |
|    |                |   | Déjerine-Sottas-Syndrom (DSS = CMT Typ 3)  | <a href="#">145900</a> |               |
|    |                |   | CMT axonal Typ 2I  | <a href="#">607677</a> |               |
|    |                |   | CMT axonal Typ 2J  | <a href="#">607736</a> |               |
|    |                |   | CMT intermediär Typ D, dominant  | <a href="#">607791</a> |               |
|    |                |   | CMT Typ 4E, dominant/rezessiv (kongenital hypomyelinisierend)                              | <a href="#">605253</a> |               |
|    |                |   | Roussy-Levy-Syndrom  | <a href="#">180800</a> |               |
| 36 | <b>MTMR2</b>   | <i>Myotubularin related protein 2</i>   | CMT demyelinisierend Typ 4B1, rezessiv   | <a href="#">601382</a> | 1,9           |
| 37 | <i>NDRG1</i>   | <i>N-myc downstream regulated 1</i>   | CMT demyelinisierend Typ 4D, rezessiv  | <a href="#">601455</a> | 1,2           |
| 38 | <b>NEFL</b>    | <i>Neurofilament, light polypeptide</i>   | CMT demyelinisierend Typ 1F, dominant/rezessiv   | <a href="#">607734</a> | 1,6           |
|    |                |   | CMT axonal Typ 2E  | <a href="#">607684</a> |               |

|    | Gensymbol      | Gename   | Erkrankung(en)  | OMIM                   | Gengröße (kb) |
|----|----------------|--|---|------------------------|---------------|
| 39 | <b>NGF</b>     | <i>Nerve growth factor</i>   | Hereditäre sensorisch-autonome Neuropathie Typ 5, HSAN5, rezessiv   | <a href="#">608654</a> | 0,7           |
| 40 | <b>NTRK1</b>   | <i>Neurotrophic receptor tyrosine kinase 1</i>                             | Hereditäre sensorisch-autonome Neuropathie Typ 4, HSAN4, rezessiv   | <a href="#">256800</a> | 2,4           |
| 41 | <b>PLEKHG5</b> | <i>Pleckstrin homology and RhoGEF domain containing G5</i>                 | CMT intermediär Typ C, rezessiv                                     | <a href="#">615376</a> | 3,3           |
| 42 | <b>PMP22</b>   | <i>Peripheral myelin protein 22</i>  | CMT demyelinisierend Typ 1A   | <a href="#">118220</a> | 0,5           |
|    |                |  | Hereditäre Neuropathie mit Neigungen zu Drucklähmungen              | <a href="#">162500</a> |               |
|    |                |  | CMT demyelinisierend Typ 1E   | <a href="#">118300</a> |               |
|    |                |  | Déjerine-Sottas-Syndrom (DSS = CMT Typ 3)                           | <a href="#">145900</a> |               |
